	Examiner Catherine N. Witczak	Art Unit 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8, 15, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8, 15, and 16 recite the limitation "the instrument access opening" in second last line. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-3 and 5-16 are rejected under 35 U.S.C. 102(e) as being anticipated by FLATLAND (U.S. Patent No. 5,752,938).

Flatland discloses a seal assembly having upper and lower body sections, a rubber valve seal having upper and lower seal portions where the upper portion has a first taper of generally frusto-conical

Art Unit: 3767

and the lower portion has a taper or inward curve defining a concave lower outer surface. See figs. 23, 29, 35, 36.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by SMITH (U. S. Patent No. 5,603,702).

Smith discloses a seal assembly with upper and lower bodies, a valve seal with upper and lower portions where the upper portion has a different taper than a lower portion and a duckbill valve 208 in the lower body portion. See fig. 11.

Double Patenting

Claims 1-16 are rejected under the judicially created doctrine of obviousness- type double patenting as being unpatentable over claims 1, 14-19 of U.S. Patent No. 6,258,065. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite the seal assembly and valve seal including a reinforcing layer between the inner and outer wall portion of the lower seal, as well as same structural relationships between the commonly recited elements.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. ERSKINE et al. (U. S. Patent No. 5,848,997), DENNIS (U. S. Patent No. 5,727,770), and GREEN (U. S. Patent No. 5,180,373) show a seal with two distinct tapers in upper and lower portions.
